# Assignment - Student Registration System

A student registration system, which is designed to add the required details of students by storing their essential details such as Student Name, Student Id, Email Id, and Contact Number. This system also allows functionalities like editing and deleting records, which ensures that the data is kept up-to-date and relevant.

Core Features and Functionality

1. Student Registration: The primary function of the system is to register new students. The registration form typically includes fields for the student's personal details like:

   o   Student Name: The full name of the student.

   o   Student Id: The Student Id.

   o   Email Id: The student's email Id.

   o   Contact Number: The student's phone number for communication purposes.

2. Editing Student Records: The system should allow to modify student details. This can be useful in cases where there are changes in contact information, etc.

3. This feature ensures that the system reflects the latest information, reducing errors or outdated data in the records.

4. Deleting Records: Sometimes, it becomes necessary to delete student records.

Student Registration System

S.No.	Name	ID	Email	Contact Number	Actions
1	Akshita Sharma	123	akshita@gmail.com	3345678888	Edit Delete
2	Anishq Sharma	456	anishq@gmail.com	4858908070	Edit Delete
3	Sakshit Sharma	477	sakshit@gmail.com	3477686868	Edit Delete
4	Nikitha Sharma	789	nikitha@gmail.com	365600963	Edit Delete

Conclusion

In conclusion, a student registration system that enables users to register, edit, and delete records provides a streamlined process for managing student data.
